

R2D2 (2015)

By Walt Wright

Long long ago, in a galaxy far far away... or so the story goes. George Lucas brought this comic book story to life. After several episodes and many years later he sold the rights to Disney. This small droid was often the hero, saving the young Jedi Luke Skywalker from certain death. Instantly recognized around the world by children and adults alike, you can't help but smile when you see him, or should I say "it". For a machine that never spoke it sure has a lot of character.

This painting was donated to The Arts Depot of Abingdon, Virginia. Its sale helps to keep the lights on and art alive in Abingdon. Thank you for supporting the arts!
