

Dragon (2015)

By Walt Wright

Many old legends speak of dragons. These fierce creatures could fly and breathe fire. Although they are myths, nothing captures the imagination better than a dragon. In most stories they are a terrible menace but in a few they are the hero. Books, movies, and even art depict these magnificent monsters in various different ways. Described as highly intelligent beast, able to speak the language of man and live an indefinite number of years. They are magnificent reptiles and to fantasize that such creatures may have once actually lived makes the hair on my neck stand up.

This painting was donated to The Arts Depot of Abingdon, Virginia. Its sale helps to keep the lights on and art alive in Abingdon. Thank you for supporting the arts!
