

The Mystic Koi 3D (2015)

By Walt Wright

This colorful 12x12 inch painting looks very nice on the wall and you probably wouldn't think it was a 3D viewable image. The sense of depth is strong and the water looks very translucent and rhythmic. Yet there is little indication that it was created for 3D glasses. Once you put them on you'll feel like you could stick your hand in the water or pick a water lily. This was painted as an entry for the holiday members art show at The Arts Depot in Abingdon, VA.

Two pair of 3D glasses are included with the painting.
