

## Wyvern - Pestilence (2022)

By Walt Wright

This 11x14 acrylic painting depicts a magical wyvern creating a disease. Using the waste of humans and nature's most vile bacteria, he insists on killing us. First it was the SARS virus, most recently the terrible Covid virus and its multiple offspring. Who knows what may hit us next. It may take decades or even centuries to defeat this dragon. Until then, it remains on the list of dragons we have yet to slay.
